

PRESS RELEASE POST ITMA ASIA 2010 MARZOLI

ITMA ASIA: 22-26 June at the Shanghai New International Expo Centre.

The Italian producers of textile machinery represented 115 exhibitors, in a space of four thousand square meters.

Marzoli, for the first time at the International ITMA Shanghai, showed and explained the innovative electronics capability of the Marzoli machinery: the control system SIMIOTION Siemens that facilitates the machinery running, the quickness of the response time, its great reliability and dimensional compactness of the adopted solution.

Many were the visitors at Marzoli booth, both from the textile sector and from public, because of their curiosity about the machinery board control, a new technology that allows a complete control of machine. Therefore, the partnership Siemens-Marzoli continues its development towards innovation, shooting for the results achievement and overall the full client satisfaction.

Chinese manufacturers were the biggest country group, booking almost 50% of the area. In addition to visitors from China, about 30% of visitors to Marzoli booth were from regions outside China, including Pakistan, India, Vietnam, Thailandia, Bangladesh, Indonesia.

Naturally we can't forget also the importance of others visitors from Turkey, Syria, Egypt and Iran. The high interest for the Marzoli technology resulted in the numerous offers required, we wish them to become orders.

Marzoli thanks all her guests and visitors and invite You at ITMA 2011 in Barcelona, where the company will show her latest innovations in machinery.
