

According to all industrial and conversion initiatives for the production of medical devices, we offer our professionalism and long experience in the manufacture of automatic machines for cutting fabrics and nonwovens, which we are sure, can offer competitive advantages in the manufacturing process.

Our peculiar cutting system guarantees extremely high productivity combined with high and constant cutting quality, in a totally automatic process that does not require specialized work force.

In addition to our main reference market for textiles / clothing, over the years we have developed various projects dedicated to other market sectors; just to name a few: a line for cutting surgical gowns for Johnson & Johnson USA, and recently, a machine for cutting surgical gauze for Sofradim France (Medtronic USA group).

We will be glad to receive your contact at info@bierrebi.com (or cell. 348 2572281 Umberto Ferrari), in the meantime, for information on our products, please visit our websites:
