INNOVATING
THE WORLD OF
**GARMENT
MAKING**

INNOVATING THE WORLD OF TEXTILES

The world is now on the brink of the fourth industrial revolution. Automation, robotics and vision control systems, together with the Internet of Things (IoT) to move data from markets to manufacturing facilities, are set to revolutionise garment manufacturing.

Today's garment makers, especially those supplying to global brands and retailers, are aware that investments in factories and in the supply chain can make them competitive by creating durable improvements in sustainability and productivity.

INNOVATION DRIVING SUSTAINABLE GARMENT MAKING

The industry focus on sustainability and ethical sourcing has changed the way fabrics and garments are made, and the sourcing requirements of brands. It has also spawned many exciting innovations in eco-friendly technologies, processes and materials.

ITMA is the world's only integrated textile and garment manufacturing technology showcase that encompasses the entire production chain. As novel application areas and new production processes continue to drive growth in the global textile and garment market, ITMA has evolved from a machinery showcase to include raw materials.

As buyers prefer to adopt a one-stop sourcing approach, ITMA 2019 will feature a plethora of solutions for garment makers, including innovative fabrics as an organic value-added extension of the fibre and yarn chapter that was launched in 2011.

ITMA is the recognised platform for

- End-to-end solutions for the entire textile and garment manufacturing value chain, including raw materials
- Only bona fide manufacturers can be admitted to exhibit
- Exhibits clustered in 19 dedicated sectors for easy sourcing
- Innovation launchpad where exhibitors unveil new technologies and products
- Live machinery demonstrations
- Effective knowledge-sharing and networking platform

ITMA – THE PROVEN MARKETING PLATFORM FOR TECHNOLOGY AND RAW MATERIAL MANUFACTURERS

Held since 1951, ITMA is the one-stop trendsetting textile and garment technology platform where the industry converges once every four years to explore fresh new ideas, sustainable innovation solutions and collaborative partnerships for business growth.

ITMA is the platform where exhibitors meet leading buyers from textile making to end-users from brands, sports and industrial sectors.

It will feature a cutting-edge garment-making technology showcase, alongside complementary sectors such as:

- Knitting
- Embroidery and braiding
- Garment and textile processing
- Printing
- Software
- Logistics solutions

With consumer demands for transparency and

traceability, and brands' sourcing needs shifting from cut-make-and-trim to turnkey packages, garment makers with the capacity to supply raw materials will have a competitive edge.

ITMA is the best place for technology providers to market to the world's leading textile and garment makers.

MAKE IT BARCELONA

Spain – home to the world's well-known fashion brands, including Loewe, Mango, Massimo Dutti, Zara and Desigual – will host ITMA 2019. Back to Barcelona after a successful show in 2011, ITMA 2019 will bring new breakthroughs in manufacturing technology and innovative materials to the global textile and garment making community.

Barcelona is one of the most beautiful and vibrant cities in the world. It is the cosmopolitan capital of Spain's Catalonia region. The city has a huge number of attractions including museums dedicated to Picasso and Miró, and the iconic Sagrada Familia church by Gaudi – Spain's most famous

architect. A gastronomic paradise, it has a scintillating atmosphere which provides visitors with a truly unforgettable experience.

Make your mark at the world's biggest textile and garment technology exhibition in lively Barcelona.
