TRANSFORMING
THE WORLD
OF TEXTILES

Great Expectations as ITMA 2023 Opens Space Application

With Covid-19, many international events within the textile industry were “postponed or cancelled. During this period, we have continued with our R&D efforts and will be leveraging the upcoming ITMA exhibition to launch our new machinery. We look forward to the face-to-face interactions with our customers and partners.”

- Beat Meienberger, CEO of Benninger AG

Highly anticipated by the global textile and garment industry, ITMA 2023 is expected to enjoy the same success when it was last held in Milan in 2015, as the world emerges stronger from the pandemic.

The world's largest international textile and garment technology exhibition, ITMA is the only place where the entire value chain is present. Plan ahead to be there to witness new trends, the launch of innovative solutions, and live machinery demonstrations.

As we invite the world's most reputable technology manufacturers to participate, expect the momentum to build up from now till ITMA opens its doors in 2023. In the meantime, join [ITMANetwork](#) to get timely updates.

What's New in ITMA 2023

Ride on the Growth Opportunities of Composites

The composite industry is bursting with opportunities and poised to become a dominant force in the textiles industry.

"We will be able to profile our composites solutions in a more prominent manner at ITMA 2023, alongside our portfolio of other innovative solutions in warp knitting, flat knitting, warp preparation and digitalisation. As a matter of fact, we had positive response at ITMA 2019 during the premiere of our completely new technology for manufacturing continuous fibre-reinforced thermoplastics as more visitors were keen to explore technical textile applications."

- Jochen Schmidt, CEO of KARL MAYER Technische Textilien GmbH

Chapter 11 features machinery for textile reinforcement structures for composites, as well as auxiliary machinery and accessories.

Chapter 20.3 features man-made fibres such as aramid and carbon fibre.

Download the Composites leaflet to find out more information.

Secure Your Space!

Secure your stand space to showcase your technology and innovations at a global platform, attended by quality visitors, comprising decision makers, innovators and industry leaders.
