

Lawer at ITMA ASIA 2023

After ITMA 2023 in Milan, Lawer will participate also to the Asian edition, ITMA ASIA 2023, from 19th to 23th November 2023. Lawer will show the TD-LAB system, which allows preparation, dispensing and distribution of dye solutions and chemicals, used in laboratory and/or sample dyeing machines.

Lawer will be at: **Hall 5 – Stand C33.**

Founded in 1970, Lawer is an Italian company that specializes in **industrial dosing and dispensing systems for the textile industry.**

LAWER supplies systems that allow to **completely automate the preparation process of powder dyestuffs, chemicals and liquid products**, starting from laboratory processing, up to the whole dyeing and finishing process.

In **over 50 years of activity**, LAWER has developed and realized **thousands of plants worldwide**, achieving relevant cost savings on any wet process, thanks to optimization of the dyeing and finishing cycles, implementation of the Right First-Time factor to reduce off-shade and re-dyeing, reducing wastes of dyes and chemicals and the cost of water treatment in a safe and clean working environment, at the same time enhancing quality and productivity.

On-line management of the dye-house and finishing dept. faces the daily challenging situations ensuring traceability of the lots, while various levels of operativity are protecting the know-how of the processes and user-friendly software are guaranteeing error-free, better efficiency and continuity at work.

The systems that Lawer produce can guarantee:

- Highest weighing / dosing accuracy
- Repeatability of the recipes
- Production management, efficiency, and cost reduction
- Fully automatic powder dyes weighing, dissolving, and dispensing systems
- Automatic liquid dosing and dispensing systems
- Highest quality of the finished product
