

Italian Textile Machinery to showcase at ITMA Asia + CITME 2025

ITMA ASIA + CITME show has always been the main showcase for textile machinery manufacturers in Asia, which absorbs 50 per cent of global exports for a value of 8.8 billion euro in 2024.

100 Italian companies will exhibit at ITMA ASIA + CITME Singapore 2025, taking place from October 28 to 31. With an area of around 4,000 square metres, Italy ranks among the top exhibiting countries, as in previous editions. 53 Italian exhibitors will show their innovations within the National Sector Groups, organised by Association of Italian Textile Machinery Manufacturers (ACIMIT) and Italian Trade Agency.

ITMA ASIA + CITME show has always been the main showcase for textile machinery manufacturers in Asia, which absorbs 50 per cent of global exports for a value of 8.8 billion euro in 2024. The main world market for textile machinery are China and India, importing textile machines for a total value of 4.3 billion euro.

For Italian manufacturers as well, the Asian market is the top foreign destination. In 2024, Italian exports to Asia amounted to 664 million euro, while in the first six months of 2025 Italian sales to this geographical area grew at 1 per cent rate on the same 2024 period, reaching a value of 317 million euro. China, India, Pakistan, and Bangladesh are the main Asian destinations for Made in Italy machinery.

ACIMIT President Marco Salvadè says, "ITMA ASIA+CITME Singapore is a further occasion for Italian textile machinery manufacturers to display its updated technological supply. The choice of Singapore allows Italian exhibitors to engage with many Southeast Asian markets, which are becoming increasingly important manufacturing hubs."

"Despite geopolitical uncertainties, the significant presence of Italian exhibitors in Singapore confirms the vitality of the Italian textile machinery sector," confirms Salvadè. "Italian manufacturers at ITMA ASIA+CITME Singapore will show a wide range of advanced solutions, covering the entire textile value chain. Visitors will see digitalisation tools that can improve process efficiency and connectivity, automation systems for smarter production and innovations able to reduce environmental impact. In addition, there will be a strong focus on sustainable technologies, with machinery designed to optimise energy and water use, while ensuring high-quality results. Italian manufacturers are committed to combining tradition in textile knowledge with cutting-edge innovation."

On his side, Giorgio Calveri, Director of ITA Singapore, states: "With 86 per cent of its 2.1 billion euro production exported, Italy's textile machinery industry confirms its strong international orientation, with Asia as its main market. ITMA Asia + CITME 2025 in Singapore is a strategic opportunity to strengthen Italy's presence in this key region. With 100 exhibitors coordinated by ACIMIT and supported by ITA, Italy stands as a trusted partner for advanced, sustainable, and competitive technologies."

ACIMIT (Association of Italian Textile Machinery Manufacturers) represents an industrial sector that comprises roughly 300 manufacturers (employing around 12,500 people), which produce machinery for a turnover worth of around 2.1 billion euro, of which 86 per cent are exported. Creativity, sustainable technology, reliability and quality are the hallmarks that have made Italian textile machinery worldwide leaders.

ITA – Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organisation and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion, and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.
