News in Singapore SALVADE' S.R.L. Stand H7/ A401

Dear Sirs

We are very pleased to attend you in the next coming ITMA ASIA in Singapore, where we are showing:

- The last version of an integrated Software installed on all the series of our famous after printing steamer, model VPM. Its main features are:
 - o An improved management of the very advanced patented technology in the after printing Steamer's steam savings: the **4.5 "Salvadè Steam Saving System"** , which guarantees a steam saving of up to 40%! And that is completely automatic and does not require any adjustment by the operator
 - A better control of the HyperWet® (SuperWet® system evolution), our system that control the chamber's Temperature and Humidity:
 - An easier the link with different process management system
 - A less dependence on component's obsolescence
- Samples showing the amazing results in terms of residual shrinkage reduction and hand feel improvement, done
 with the possible combinations of our three drying/tumbling solutions
- Samples of special finishing such as:
 - Metal/fancy foil applications
 - o Multilayers laminating thanks to thermo-bonding material
 - Heat transfer printing
 - o Crashing, width and length wise
 - Various pleating
