Reasons for a world success

Italian companies involved in the sector are small-size companies, deeply committed to R&D activities, looking for close cooperation with customers to create new opportunities and suitable solutions.
The ability to understand the needs of potential customers enables Italian companies to turn them quickly into dedicated machinery and devices which give rise to new high value-added market niches (such as the technical textiles) in the world textile market, both as regards economical and technological aspects.
Italian textile machinery companies are placed in areas of ancient textile tradition, where an exchange of experience with end users offers a strong impetus to the constant technological upgrading of machinery. Textile clusters are located in Northern and Central Italy: Bergamo, Biella, Brescia, Como, Milan, Prato, Vicenza.

The main characteristics that distinguish Italian textile machinery sector are:

- **skilled workforce** that ensures a high quality of products;
- **the dimensions of Italian companies** that allow a quick response to the need of each customer;
- **the flexibility and versatility** ensure a customized production for satisfying the needs of each customer;
- **the high technological level** of the supply, due to the constant attention paid by Italian companies to the R&D activities and to innovative solutions.

China: a leading market for Italian textile machinery industry

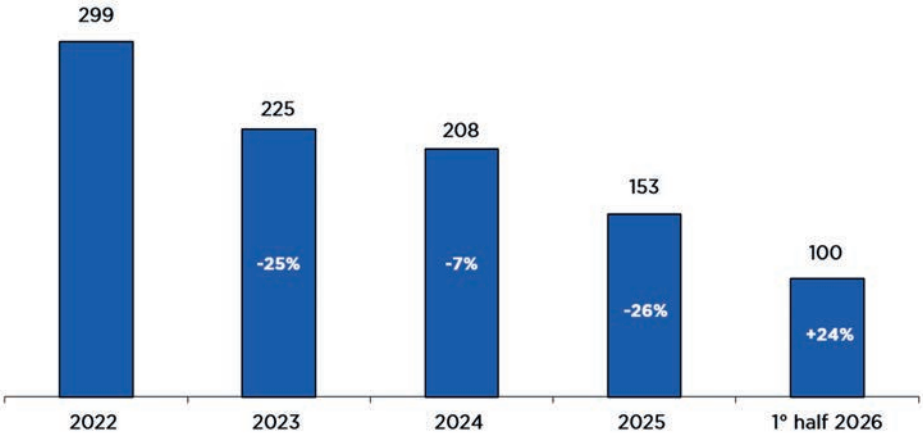

China remains a key market for the Italian textile machinery industry and one of the leading destinations for Italian technology worldwide. In the first half of 2026, Italian textile machinery exports to China amounted to approximately **€100 million**, **following €153 million in 2025**.

While these figures reflect the current adjustment in investment levels, China continues to play a central role in the global textile manufacturing landscape. The scale and technological evolution of its textile industry make the country a strategic partner for Italian machinery manufacturers, particularly as producers increasingly focus on **automation, digitalisation, higher productivity, energy efficiency and more sustainable manufacturing processes.**

Italian textile machinery manufacturers are well positioned to support this transformation. Their strength lies in a highly specialised and diversified technological offering, combining **innovation, flexibility, reliability and tailor-made solutions** across the entire textile production process.
